Education

Axis College, Kanpur 2024-2028

B.Tech. (Computer Science and Engineering) CGPA: 7.24

Radha Krishna Memorial Education Centre 2024

ISC Board, Kanpur Percentage: 70%

Radha Krishna Memorial Education Centre 2022

ICSE Board, Kanpur Percentage: 74%

Personal Projects

Jansetu – Smart Public Service CRM | [Project Link](#) Feb-2026

Civic complaint management system with AI-based classification, real-time tracking, and automated department routing

- Tools & technologies used: React.js and Next.js for frontend, Python and FastAPI as backend, PSQl for database
- API used: Brevo, Ola maps, Grok (whisper large v3)
- Full-stack civic issue reporting platform enabling citizens to submit complaints with photo and GPS data. Implemented automated complaint classification, department routing, and real-time tracking to improve transparency and resolution efficiency.

Sahayak – Cooperative Gig Services Platform | [Project Link](#)

Cooperative platform connecting customers with verified local service workers through smart matching and digital service management

- Tools & technologies used: Next.js, React.js, JavaScript, Python, FastAPI, PostgreSQL
- Developed a full-stack platform with OTP-based authentication, admin-gated worker verification, skill/location-based service discovery, smart worker matching and live GPS tracking with ETA.
- Implemented in-app communication, itemised billing, UPI/QR payments, PDF invoices, digital service history, ratings, trust scores and dispute resolution for transparent service delivery.

Software-License-Management Dec-2025

Automated Software License requests and installations, optimising employee requisition workflow

- Tools & technologies used: React.js for frontend, Node.js and Express.js as backend, MongoDB for database
- A user-friendly interface that enables employees to submit software license requests directly through the platform, eliminating the need for cumbersome paperwork or email chains.
- Designed and developed user-friendly interfaces for license requests and management.

Technical Skills and Interests

Programming Languages: C++, Java, Python, C, JavaScript

Developer Tools: Visual Studio Code (IDE), Git- GitHub

Frontend Languages: HTML, CSS

Frameworks and Libraries: React.js, Node.js

Soft Skills: Communication, Teamwork, Networking

Databases: SQL

Areas of Interest: Data Structures and Algorithms, Problem solving, Object Oriented Programming, Computer Networks, Operating Systems, debugging and automation

Achievements/Certifications

- Participated in India Innovates 2026, contributing to discussions on innovative tech solutions
- Completed Ethical Hacking Internship from EduSkills Academy.
- Completed Generative AI Content Creation Course by Adobe.
- Completed HTML Essential Training
- Completed 10-week Android Developer Virtual Internship under the National Internship Portal
